

We are an innovative, international life science company with 17 employees working in our offices and laboratory in the city of Innsbruck, Austria. Our technologically world-leading device, developed for the measurement of cellular respiration, is distributed in 49 countries in direct contact with scientific users.

To strengthen our team, we fill the following **full-time position** (40 h) at the earliest opportunity:

## **IT-Specialist / System Administrator (m/f)**

We offer: a varied range of tasks with a very good working atmosphere in the team, performance-oriented salary (classification based on the collective agreement for employees and apprentices in commercial enterprises and overpayment according to experience and qualifications) and innovative development opportunities!

### **Your tasks include:**

- Tests for software development (including bug fixing).
- Software quality control and documentation.
- Working at the interface between software and hardware (including machine-level programming).
- Technical support (written, by e-mail).
- In-house system administration (Windows).
- Maintenance of the company website (partially).

### **Your profile:**

- Successful completion of a relevant university or college degree program.
- Interest in life science and research.
- Excellent written and spoken English (foreign experience and skills in German language are beneficial).
- Experience with operating systems (Windows), networks, server structures and content management systems.
- Flexibility, organizational and communication skills appropriate for an innovative company, personal engagement in everyday work.
- Thorough approach to work, sure instincts, team spirit.
